- Cert IV Workplace Assessment & Training
- Associate Diploma OHS

Professional Memberships

- Certified Professional Member - Safety Institute of Australia (Vic)
- Registered Safety Practitioner (Australia)
- OHS Systems Auditor – RAB-QSA
- Member – Victorian Transport Association

Experience

Denise has extensive industry experience as an OHS Manager (both permanent and contract), Injury Management Advisor and Consultant, in a career in OHS of over 16 years. These roles have enabled Denise to gain broad industry experience, working in:

- Transport
- Manufacturing
- Printing
- Health
- Trades & Services

In recent years, Denise has chosen to specialise in the transport industry, with both long term contract roles and consulting assignments to improve traffic management, loading/unloading and freight handling systems. Denise is also a member of the Victorian Transport Association an active participant in industry events.

Professional Achievements

- In 2014, Denise was invited to be the contributing author on safety culture in Small & Medium Enterprises in the OHS Body of Knowledge for Generalist OHS Professionals. This accolade recognises Denise's advanced and specialised skills to apply OHS within the SME environment.
- Denise is also on the panel of independent consultants with the Victorian WorkCover Authority. This allows Denise to deliver the VWA funded OHS Essentials Program to small and medium businesses.

Contract/Consulting Projects

- Safety system development and implementation to SafetyMAP Initial Level certification for over 7 years in a medium sized freight forwarding organisation.
- Managing WorkCover Claims and Return to Work for a labour hire company supplying industrial and transport staff.
- Safety systems development and in-house support over 4 years to one of the top wharf carriers on the Melbourne waterfront, with over 15000m² of warehousing and five sites.
- Supplying in-house health, safety and environment specialist support within a sales and service environment for printing and graphic equipment employing approximately 160 staff across Australian & New Zealand operations for 7 years.
- Assisting a medium sized manufacturing company with high level interaction with WorkCover. This resulted from a number of improvement notices being outstanding for over 12 months. All notices were lifted and the intervention was significantly reduced.
- Developing and implementing a traffic management system for a busy hardware store public car-park following WorkCover intervention
- Developing and delivering systems for compliance for sub-contract drivers within Transport Principal Contractors.
- Delivering training and awareness sessions via toolbox meetings and induction refresher sessions.
- Assisting numerous organisations with compliance with WorkCover Improvement Notices.
